---NEW FEATURES, CHANGES, & BUG FIXES---

â€¢ Skip Group Members feature added: Now you can choose to not send items/messages to avatars with same group tag active as object. They will also not be counted. This is good to not spam staff members or yourself. Set in Configuration notecard.

â€¢ Starting Count and Start Date can now be set in Configuration. Great for when you replace an older version or older counter and want to keep count going.

â€¢ Better default sound file added.

â€¢ Script count reduced to lower lag.

â€¢ Other bug-fixes added.
