
[NEW PRODUCT: Day/Night Sound Rock](#)

Category : [Announcements](#)

Published by Alicia Stella on Jul-01-2019

Play sound effects like birds during the day and crickets or owl sounds at night. Detects the sun position in your sim and plays sounds that correspond with day or night.

Works right out of the box, and includes two versions.

The Looped Sound Rock will play a looped sound for when it is daytime in your sim and a different sound when it is nighttime in your sim. You can change the volume and replace the sounds as needed.

The Random Sound Rock will play a random sound effect from a list at random intervals of time you set. There is a different list for daytime and nighttime, as well as separate volume settings.
