Web Server Issues [RESOLVED 4/17]

Category : **Announcements**
Published by Alicia Stella on Apr-15-2014

RESOLVED 4/17 4:05 AM PST: Web server should be back up and running. You may need to reset your Tipping Server or other web-based items, but only if they have shut down during the outage.

UPDATE 4/16 3:15 PM PST: Server may be down and up again until service is fully restored, hopefully shortly. Sorry for the trouble. See this for details:
http://forums.hostgator.com/network-outage-provo-p517996.html

The WebTools server was down briefly earlier today, but should be running again now.

If your web-based item is not responding in Second Life you may need to reset the scripts. Most items should come back online on their own though.

Sorry for any trouble this interruption may have caused.

Information about the issue can be seen here:
